

Software Architecture 2024 [2026]

Lecture 2, part 1/2

Introduction

Wouter Joosen

Laurens Sion

Dimitri Van Landuyt

Practicalities

Project teams have formed

- › Teams have been registered to Ultra/Toledo
- › If you are not in a Toledo Team, send us an E-mail!

 Software Architecture: Lecture [H07Z9a]

-  Announcements
-  Team Registration (until 21/02)
-  Course Documents
-  Course Project
-  Lab sessions
-  Project Evaluation Sessions 
-  Discussions
-  Blackboard Collaborate
-  Tools 
-  Contacts
-  Course Information
-  ECTS

MY GROUPS

 **YOUR TEAM NAME**

Lab sessions: modus operandi

- › You work *as a team*^{*} on the assignment
- › We provide *continuous support*
 - › Role of customer – clarifying what the customer wants, ...
 - › Role of expert – clarifying concepts, technical feasibility, ...
 - › Role of discussion partner – asking the right questions, ...
 - › Direct feedback – but *targeted* and *with caveats*

Discussion boards: modus operandi

- › Live and evolving **FAQ**
 - also for errata, clarifications and additional information about assignment
- › Any question goes – there are **no bad questions**
- › This is a bi-directional channel
 - › We participate – you participate
 - › We follow-up the discussion – you follow-up (subscribe to mail notifications)
 - › Common issues/common questions in lab sessions will proactively be posted by us, with a clarification or answer
- › Phrase your question **carefully** – be **polite** and **constructive**

Project Phase 1 – quick recap

- *Generate 15 ASRs, identify utility*
- *Refine 3, highly ranked ASRs*

Lecture plan

1. Course introduction
2. **Quality requirements and architectural significance**
3. Software architecture defined
4. Architectural views
5. Architectural models
- ...
